EDUCATION

College of Electronic Devices, Ukraine
Computer Technology, 2006

SOFTWARE EXPERIENCE

GENERAL ASSEMBLY, BOSTON MA

Software Engineering Immersive | Mar.19 to Jun.19

- Completed a 12-week / 480+ hour immersive course on software engineering using a variety of modern programming languages and technologies.
- Built quality RESTful APIs and integrated data from third-party APIs.
- Designed and built multiple web applications using frameworks.
- Utilized Git and Github version control.

DEVELOPER PROJECTS

Weather App

The Weather app allows you check the weather condition at any place. In this project I used third party API from openweathermap.org to get current weather condition. Tech used: React, Express, MongoDB, HTML, CSS, and Bootstrap.

That Hat

ThatHat is an e-commerce app that allows a user to purchase items from the store. With checkout integration powered by Stripe. Created with HTML, CSS, JavaScript, Ajax, Bootstrap, Handlebars, Stripe, jQuery and AJAX, connected to an Express API and MongoDB.

To Do List

SPA that allow users create and track their daily tasks in an easy-to-use way. To Do List is first full-stack project that uses Ruby On Rails for the back end and JavaScript, jQuery, HTML, CSS and Handlebars.js on the front-end.

Tic-Tac-Toe

My implementation of this famous game. This SPA interacts with a RESTful Rails API to manage user and game data. Created with JavaScript, HTML, CSS, jQuery, Ajax.
